

# IF YOU WANT BETTER PERFORMANCE FROM YOUR EQUIPMENT, YOU'LL HAVE TO SEE OUR **SUPERIORS.**

You rely on quality components to complement your equipment. So you should know, Superior Gearbox Company's standard or custom right angle gearboxes and worm drives are designed to be interchangeable with others—only better. That's because Superior features on our models are not found on competing brands.

Our Superior aluminum split case design gives you significantly lower weight with improved heat dissipation. In addition, our Superior right angle gear drives feature taper roller bearings and AGMA Class 8 precision forged gears which are stronger and tend to run quieter than those found in typical bevel gear drives.

Superior worm drives use bronze and steel gears for strength and durability. They also feature our aluminum split case design for high strength, corrosion resistance and thermal capacity.

For more information, or to see our Superiors, just call 1-800-346-5745.
